EXPERIENCE

Open Source Contributor   May 2023 - Present
Girl-Script Summer of Code 2023

- Contributes in 20+ projects
- Working on Front-end designing using advance CSS
- Proficient in managing version control systems, particularly Git.
- Continuously learning, embracing open source trends.

Frontend Developer - (Team:- Abhedya)   Oct 2022
NASA Space Apps Challenge 2022

- Frontend Web Designing
- Working on Three.js for 3D designing
- Project Presentation
- Selected as a finalist team.

Sr. Member in Technical Team and Event Management   Oct 2022 - Present
Entrepreneurship Cell, Galgotias University

- Technical Support
- Content Writing
- Event Handling
- Marketing and Public Relations

PROJECTS

DevResume "DevResume" a React.js and Chakra UI powered resume builder website tailored for developers. With its basic templates, DevResume simplifies the process of creating professional resumes, allowing developers to effectively highlight their skills and experience for better career opportunities. (Deployment)

Meetup (A real time Chat App): Meetup is a real-time public chat app designed to connect users with random individuals in a public chat room. It enables users to engage in spontaneous conversations, make new friends, and discuss various topics in a dynamic and interactive environment, fostering a sense of community and social interaction. (Deployment)

Task-To-Do (A local Storage based todo app): Task-To-Do is a local storage based todo app designed to help users manage their tasks efficiently. With a clean and intuitive interface, users can create, organize, and prioritize tasks, set due dates, and mark tasks as complete. The app provides a convenient way to stay organized and increase productivity. (Deployment)

Password Generator: My password generator creates strong, random passwords with customizable length and character sets. It helps to increase online security by generating unique passwords for each account.(Deployment)

Portfolio:(React) My Portfolio" is a ReactJS-based web application showcasing my professional experience, skills, and projects. It features an elegant, user-friendly design and provides visitors with a comprehensive overview of my qualifications and achievements..(Deployment)

Text-Custom "Text Custom" is a ReactJS-based web app that allows users to easily convert text from uppercase to lowercase and remove extra spaces. It also provides a convenient "Copy to Clipboard" function, streamlining the text editing process.(Deployment)

Musicker Musicker is a python based music player application that allows users to play and manage their favorite songs. With a user-friendly interface and essential features like browsing music, creating playlists, and controlling playback, Musicker makes listening to music a delightful experience.(Deployment)

EXTRA-CURRICULAR ACTIVITIES

- Active participant in university-level cricket, badminton and volleyball tournaments, honing teamwork and communication skills through these sports.

- Regularly organize friendly cricket and volleyball matches with peers, promoting a healthy and active lifestyle.

ACHIEVEMENTS

- Got Selected in GirlScript Summer Of Code 2023.(Link)

- Got Selected in Social Summer Of Code (Season-2).(Link)

- CodeRush 2023 (AIR-1435): Coding Competition by Newton School

- Finalist of NASA Space App Challenge over 1000+ students

- Got 5th Position in Hackerfest in my University.

COMPETITIVE PROGRAMMING

- HackerRank (Link)

- CodeChef (Link)

CERTIFICATIONS

- Galactic Problem Solver : NASA Space App Challenge (Link)

- Data Processing Specialist : Aspiring Minds (AMCAT Exam)(Link)

- TCS iON Career Edge - Young Professional : TCS iON(Link)
